Summary:

Graduated student searching for my first opportunity as a developer. Front-End Web Developer with two years of code experience in website design and MERN design concept. Knowledge and skills in front and back-end web development. Experience in a variety of areas and the ability to learn independently and quickly.

What I'm looking for at my first job:

- Working and coding with HTML CSS JavsScript.
- Working with Node.js at the backend.
- Collaboration as a team member.

What I'm doing on a daily basis:

- Working on an open source project
- Contributing to other projects on Github.com
- I'm coding for 3 hours every day
- Familiar and working on my other skills as a developer such as learning Jira, Agile and Scrum.

Knowledge and Skill:

- **Frontend**: HTML CSS react JavaScript Styled-Components TypeScript Redux
- **Backend**: Node Mongoose APIs REST Python Firebase
- **Databases**: MongoDB
- **Development & Operations:** Git Heroku netlify

Projects:

2021   **React Full Stack Project, React, TypeScript, Firebase, Styled-Component**

Web application for tasks management

Develop a full-stack application with React and Firebase.
React Hooks, async/await & modern practices.
https://todoapp-stoic-davidabou.netlify.app/
